FLY ANGLER

Brightwater Garbage Scow Instructions

Our Garbage Scow hangs conveniently from your pack or vest and safely holds all the bits and pieces of trash you generate while fishing. The Scow holds old line, scraps of tippet, old leaders and stray wrappers. All your trash is held securely for disposal at days' end.

The Brightwater Garbage Scow helps keep our streams, rivers and lakes clean, protects wildlife and is designed to "Keep Our Waters Bright".

Grasp the end of the Brightwater Garbage Scow with two fingers on either end of the slit cap. Gently squeeze the tube to open the end and insert your trash.

To empty use your thumbs to slide the end cap of the Garbage Scow and remove the contents. Please dispose of your trash properly.
